$x = 121 \longrightarrow y = 121$

① place into the array

② check palindrome.

$121 / 10 \Rightarrow 12$ = div

$121 \% 10 = 1$ = Rem

1	2	1

⇒ without using extra space ⇒

int revNum = 0; n = 121

revNum = 1

rem = 121 % 10 ⇒ 1 | 2 | 1

revNum = 0 * 10 + rem = 1 | 2

1 × 10 + 2

10 + 2 = 12

12 × 10 ⇒ 120 + 1 = 121

n = n / 10;
